

Hot Girl Meg has joined the party. Following her debut mixtape, Houston's Megan Thee Stallion has just released her highly anticipated project, *Fever*. According to the 300 Entertainment rapper, *Tina Snow* was a look at just one of her alter egos. *Fever* is the representation of her Hot Girl Meg persona, and will showcase a confident party freak with hard, swagger-laced bars.

Megan has had a remarkable year thus far, with "Big Ole Freak" skyrocketing her to the tip-top of everyone's watchlist. While it is possible that Thee Stallion had a plethora of potential A-list collaborators knocking on her door, the Houston artist opted to brave the debut album road almost completely alone. The 14-track project boasts just two features, DaBaby and Juicy J, as the hot girl shows the world she is more than capable of holding her own.

While *Fever* is definitely beat-heavy, the sound of the album is diverse and varied. *Fever* is able to deliver a track for every mood— you'll find an easygoing, up-beat bop with "Best You Ever Had," before finding hard-core party raps on "Dance" and "Ratchet."

Meg can only go up from here. Get into the heat of *Fever* below. And if you missed her freestyle with the LA Leakers, don't fret, you can watch and listen [HERE](#).
